# Why ANEX 2027

## Leading Exhibition for the Nonwovens Industry in Asia – ANEX

### World's Top 3 Nonwovens Exhibitions

A global marketplace where leading nonwovens companies gather to showcase new products and technologies, while sharing the latest industry trends.

### The Largest Market & Production Hub - Asia

Held in Asia, the world's largest demand and production in nonwovens.

### Expanding Applications Across Industries

From hygiene and filtration to healthcare, eco-friendly & sustainable materials, and advanced industrial applications—discover the full spectrum of nonwoven innovations.

### Asia's Advanced Industry Hub - Korea

A dynamic base for defense, IT & electronics, shipbuilding, automotive, construction, and biotech industries—offering direct access to emerging demands and new business opportunities.

### The Business Center of Asia

Korea is a strategic gateway with excellent accessibility from China, Japan, Southeast Asia, and beyond.

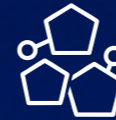

## Where global gatherings meet vibrant culture and boundless business opportunities, Korea!

Equipped with state-of-the-art facilities, COEX offers unparalleled convenience—seamlessly connecting transportation, accommodation, shopping, and cultural experiences in one destination.

## ANEX 2027 FIGURES \* expected

## EXHIBIT PROFILES

### Raw Materials

Synthetic and natural fibers such as polypropylene, polyester, and cotton, etc. -tailored for performance, softness, and sustainability.

### Nonwoven Roll Goods

Sheets of nonwoven fabric supplied in continuous rolls, used as base materials across hygiene, medical, filtration, and industrial applications, etc.

### Finished Goods

End-use products made from nonwoven fabric, including products like face masks, diapers, wipes, filters, and medical gowns, etc.

### Nonwovens for Application

Nonwoven fabrics across diverse industries and end-products, ranging from automotive and construction to healthcare, filtration, and consumer goods, etc.

### Machineries

Equipments for web forming, bonding, finishing, and converting—supporting the production of nonwoven materials and products, etc.

### Services and Others

Testing, certification, R&D, logistics, and consulting that support the entire value chain, etc.
